

# Molecular Biologist Scientist (UK)

## Tasks and Responsibilities

- Perform various testing procedures on scientific samples used to technical services.
- Perform sample (genomic DNA & RNA) preparation procedures
- Perform procedures in whole genome and whole exome sequencing workflow
- Perform sample and assay level quality control
- Prepare and maintain documentation to support the Quality Management System

## Minimum Qualifications (Must have)

- Experience with nucleic acid isolation and molecular biology techniques including PCR and DNA sequencing. Experience with next-generation sequencing (NGS)-based testing is preferred.
- Education, Work Experience and/or Licensure
- A Bachelor's degree or equivalent experience in molecular biology or a related laboratory-based discipline
- 2+ years' experience in a laboratory setting; preferably with experience in a high complexity molecular testing environment

## Job type

Full-time

## Job location

Babraham Research Campus, Cambridge,UK

If you're interested in applying for this position, please send your resume or CV to [hemeng@novogene.com](mailto:hemeng@novogene.com).

# Molecular Biologist Scientist (CHN)

## Tasks and Responsibilities

- Perform various testing procedures on scientific samples used to technical services.
- Perform sample (genomic DNA & RNA) preparation procedures
- Perform procedures in whole genome and whole exome sequencing workflow
- Perform sample and assay level quality control
- Prepare and maintain documentation to support the Quality Management System

## Minimum Qualifications (Must have)

- Experience with nucleic acid isolation and molecular biology techniques including PCR and DNA sequencing. Experience with next-generation sequencing (NGS)-based testing is preferred.
- Education, Work Experience and/or Licensure
- A Bachelor's degree or equivalent experience in molecular biology or a related laboratory-based discipline
- 2+ years' experience in a laboratory setting; preferably with experience in a high complexity molecular testing environment

## Job type

Full-time

## Job location

Tianjin/Nanjing,CHN

If you're interested in applying for this position, please send your resume or CV to [hemeng@novogene.com](mailto:hemeng@novogene.com).

# Clinical Genetic Molecular Biologist (USA)

## Tasks and Responsibilities

1. Perform various testing procedures on clinical laboratory samples used to aide physicians in the diagnosis and treatment of patients
  2. Perform sample (Genomic DNA and RNA) preparation procedures.
  3. Perform procedures in whole genome and whole exome sequencing workflow. Perform sample and assay level quality control.
  4. Prepare and maintain documentation to support the Quality Management System. 2+ years experience in a clinical laboratory setting, preferably in a high complexity molecular testing environment.
  5. Experienced in nucleic acid isolation and molecular biology techniques, including PCR and DNA sequencing
  6. Active California Clinical Laboratory Scientist license (Genetic or Molecular Biology)
- Job Type: Full-time

## Job type

Full-time

## Required experience

NGS and PCR: 1 year

CLIA/CAP certification processes and laboratory operations: 2 years

## Required education

Bachelor's

## Job location

Sacramento, CA

## Required license or certification

CGMBS

If you're interested in applying for this position, please send your resume or CV to [hemeng@novogene.com](mailto:hemeng@novogene.com).
